

MARCHWOOD WHARF PROCESSING OF SEA DREDGED BALLAST

Client: Lafarge Aggregates Ltd

Annual Tonnage: Circa 200,000 Tonnes

The project involves acceptance of unprocessed sea dredged material quayside at the wharf, Marchwood which is then picked up and put through a semi-mobile washing plant and split into sand, 10mm, 20mm and 40mm products. Some of the 40mm material is crushed and re-screened depending on demand.

The site employs two operators and a site manager all of whom have a wealth of experience in this field.
